PATENT COOPERATION TREATY

PCT

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (Chapter I of the Patent Cooperation Treaty)

(PCT Rule 44bis)

Applicant's or agent's file reference 12144-030WO1	FOR FURTHER ACTION	See item 4 below
International application No. PCT/US2006/047963	International filing date (day/month/year) 15 December 2006 (15.12.2006)	Priority date (day/month/year) 16 December 2005 (16.12.2005)
International Patent Classification (8th See relevant information in Form P	edition unless older edition indicated) CT/ISA/237	
Applicant AIRVANA, INC.		

1.	This international preliminary report on patentability (Chapter I) is issued by the International Bureau on behalf of the International Searching Authority under Rule 44 bis.1(a).				
2.	This REPORT consists of a total of 4 sheets, including this cover sheet. In the attached sheets, any reference to the written opinion of the International Searching Authority should be read as a reference to the international preliminary report on patentability (Chapter I) instead.				
3.	. This report contains indications relating to the following items:				
Ì	Box No. I	Basis of the report			
	Box No. II	Priority			
	Box No. III	Non-establishment of opinion with regard to novelty, inventive step and industrial applicability			
ļ	Box No. IV	Lack of unity of invention			
	Box No. V	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement			
	Box No. VI	Certain documents cited			
	Box No. VII	Certain defects in the international application			
	Box No. VIII	Certain observations on the international application			
4.		rommunicate this report to designated Offices in accordance with Rules 44bis.3(c) and 93bis.1 but makes an express request under Article 23(2), before the expiration of 30 months from the priority			

	Date of issuance of this report 27 November 2008 (27.11.2008)

WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No. PCT/US06/47963

Box No. V Reasoned statement under Rule 43 bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1.	Statement				
	Novelty (N)	Claims	NONE	YE	S
		Claims	1-48	NO	
	Inventive step (IS)	Claims	NONE	YE	S
		Claims	1-48	NO	
	Industrial applicability (IA)	Claims	1-48	YE	s
		Claims	NONE	NO	

2. Citations and explanations:

Claims 1-48 lack novelty under PCT Article 33(2) as being anticipated by Newbury et al.

Regarding claims 1, 4, 13, 15, 17, 19, 22, 24, 27, 29, 36, 38, 40, Newbury teaches a method/system comprising: enabling a radio access network to cause an access terminal in communication with the radio access network to send an update including information about a location of the access terminal (0011,0015).

Regarding claims 2, 18, 23, 28, Newbury teaches a method of claim 1, wherein the radio access network causes the access terminal to send the update by broadcasting trigger information (0015).

Regarding claims 3, 5, 16, Newbury teaches a method of claim 2, wherein the trigger information comprises a trigger that is specific to a cell of the radio access network (0011,0012).

Regarding claims 6-8, Newbury teaches a method of claim 4, wherein the query information comprises a query that is specific to a carrier frequency on which a radio node of the radio access network or a different radio access network operates (0016).

Regarding claims 9-10, 20-21,25-26, 31,33-34, 41-44, Newbury teaches a method/system wherein the information comprises a sector identifier and a pilot strength associated with a sector of a macro cell and a sector of a pico cell (0016, 0017).

Regarding claims 11, 35, Newbury teaches a method of claim 1, further comprising: using the information sent by the access terminal to determine whether a handoff between cells of the radio access network is to be performed (0016, 0018).

Regarding claim 37, Newbury teaches a method of claim 36, wherein initiating further comprises sending a TrafficChannelAssignment message (0015, 0017, 0018, 0019, 0021)1

Regarding claims 47-48, Newbury teaches a method wherein the first cell and the second cell both operate on a common/different carrier frequency (0016). In the CDMA system the frequencies are the same for all the same.

Claims 1-48 meet the criteria set out in PCT Article 33(4), because the invention is useful to the industry.
